Palembang, South Sumatera, Indonesia, 30257

Diploma 3 Informatics Management graduate with hands-on experience as a Web Developer at Polsri and IT Admin at the South Sumatra Provincial Archives Service. Skilled in full-stack web development, mobile application development, and database management. Certified Junior Mobile & Web Programmer with strong problem-solving abilities and adaptability.

Work Experience

State Polytechnic of Sriwijaya - Palembang, South Sumatera

Feb 2025 - Oct 2025

Web Developer Digitalization Academic Project

A state vocational college in Palembang that provides applied diploma and master's education with a focus on developing practical and professional skills.

- Developed a Chemical Engineering Department Information System website equipped with a Content Management System (CMS), enabling admins to manage content independently without technical assistance. Tech stack: Next.js, Supabase, & cPanel.
- Developed the Internal Supervisory Unit (SPI) website for Polsri as a Solo Developer, providing agency information and an integrated online reporting system. Tech stack: CodeIgniter4, MySQL, & cPanel.
- Implemented "Complaints" and "Aspirations" reporting features, streamlining the submission process for academics to share feedback and suggestions online.

South Sumatra Provincial Archives Service - Palembang, South Sumatera

Aug 2024 - Nov 2024

Admin & IT Internship

A regional government agency that organizes the management of dynamic and static archives, as well as the development of archival systems within the South Sumatra Provincial government.

- Developed a Kotlin and Firebase-based Android application for intern attendance tracking, improving attendance recording efficiency and data accuracy.
- Developed a dynamic archive management website with OCR technology integration, accelerating the digitization and archiving process.
- Managed and recorded over 100 archives systematically using Microsoft Excel, ensuring efficient search capabilities and structured organization.
- Processed archive data entry in the SRIKANDI application for incoming and outgoing correspondence, supporting government administration digitalization and transparency.

Level of Education

State Vocational School 8 Palembang - Palembang, South Sumatera

Jul 2019 - Jul 2022

Senior High School, Teknik Komputer dan Jaringan, 88.00/100.00

- Mastered the basics of computer assembly, operating system installation, and hardware and software troubleshooting.
- Learned the installation and configuration of LAN and WLAN networks, as well as network management using Mikrotik to support optimal connectivity.
- Developed technical understanding in network systems, problem-solving skills, and IT infrastructure maintenance.

State Polytechnic of Sriwijaya - Palembang, Sumatera Selatan

Aug 2022 - Aug 2025

Diploma III Manajemen Informatika, 3.65/4.00

- Developed website-based applications and information systems for academic projects, including system analysis, UI/UX design, code implementation, and testing to produce functional solutions.
- Learned to use Microsoft Office (Excel, Word, PowerPoint) and Google Workspace (Sheets, Docs, Drive) for data processing and documentation.
- Obtained official certifications through contributions to academic digitalization projects on campus, enhancing practical skills in software development.
